Green Roof Plant of the Month

Drowning Your Roof?

By Kat Harrold GRP, Jörg Breuning, Andrew Cole Yanders

Extensive Green Roof Irrigation

It is difficult to justify the necessity of an irrigation system for extensive green roofs. An irrigation system wastes potable water on plants that do not need it. This excess water only serves to promote the growth of

Brush up on your green roof plant knowledge with a new plant every month! Only on our Green Roof Plant Blog!

unwanted plants from foreign origins.

Akron University Green Roof

Green Roof Technology and IKG Architects will collaborate to design Akron University's first green roof. The green roof on the Sydney L. Olson Research Center will be an 18,000 sf. extensive system planted with a diverse variety of sedums and hardy flowers and herbs.

Sun Root FAQ's Answered

Since the release of our Sun Root living roof system we have been receiving a lot of questions about the benefits of this system and what makes it so different from other solar panel or photovoltaic (PV) systems. To answer these questions we have composed a information packet which shines a light on the most frequently asked questions.
